

VICTORIAN DESALINATION PROJECT

MEDIA RELEASE

8 March 2016

VICTORIAN DESALINATION PROJECT CALLED INTO SERVICE

AquaSure welcomes the release of a 50GI supply notice for desalinated water to be delivered over the period from 1 July 2016 and ending 30 June 2017.

Now that we have certainty on the volume of water to be delivered we will prepare our supply plan (which is due to be provided to the State by early June 2016) and in due course commence the plant's transition from its current status to production mode.

We have flexibility about when, and in what quantities we deliver water over the supply period, which allows us to optimise operating efficiencies.

Matt Brassington
CEO, AquaSure
